

“I suffered from excruciating pain and my daily activities were affected.”

are the same Jesus that will heal me today”.

After saying this prayer, I immediately felt a tingling sensation that went through my outstretched fingers to the part of my back where my pain was.

And I immediately felt different.

Although I have been a Christian for 21 years, I had never encountered an experience like this. It was as if God knew that I had doubts about the healing, because the next thing that happened to me was that I sneezed. Not just once, but four times!

If you ever suffered from a slipped disc in your life, you would know that sneezing or coughing can be an extremely painful experience. However, I did not feel any pain in my back when I sneezed four times.

That was when I knew I was healed. God has healed me!

The next day, I went to swim 500 meters. And I can run again today.

Thanks be to God!

GOD HEALS!

Tan Chin Hwee, 43

Early last year, I was diagnosed with a moderate slipped disc in my back. I had pain in my lower back and I was unable to walk or sit for long periods of time.

Since young, marathons and triathlons have been a huge and regular part of my life. The slipped disc caused great hindrances to my lifestyle and I have not been able to do many things because of it. Even the little things, which I value a lot, like bathing or carrying my children every day I could not do because of the inability to bend my spine. My doctor also advised

me to rest and start on physiotherapy sessions. My physical condition has improved vastly since. However, on a Monday before a God Encounter Meeting (GEM), I had a re-lapse. I suffered from excruciating pain and my daily activities were affected again.

Upon attending GEM that week, I sought God for healing. From where I was in the sanctuary, I prayed to God saying, “Jesus, even if I do not walk out of my seat to the front, I know you can heal me from where I am. For I know You are the same Jesus that healed in the Bible and You
